TRACE-IT TECHNOLOGIES INC. - AURORA ILLINOIS

Jasper Meats Inc, Chicago IL, selects Trace-It Technologies Warehouse Management Systems for their new distribution center in Bloomingdale IL.

Jasper Meats is a wholesaler of fresh and cooked meats and other items to restaurants, institutions and grocery stores in the metropolitan Chicago area.

Having outgrown their 4000 sq ft warehouse in the Fulton market district of Chicago, the company is presently construction a new 18,000 sq warehouse in the nearby western suburb.

The new facility; scheduled to begin operations this summer, will also warehouse and distributes a wide variety of cheeses, poultry items as well as hardware items such sanitation equipment; all delivered via their fleet of delivery trucks.

Jasper has always managed their business with pencil and paper. Understanding this method would not work as they expand their inventory and markets with the new facility, Stan Pajerski, owner selected Trace-It to implement a wireless, real-time warehouse management system for receiving and inventorying purchased inventory, order picking and sales order fulfillment.

Stan who is also the managing partner of Pork King Packing, Marengo IL, chose Trace-It based on their positive experience working with us over the past three years. "Our employees at Pork King love the Trace-It system and for this reason and their ability to adapt their software to our specific needs, we have selected them for the new facility".

In addition to Trace-it's scanning systems for inventory and warehouse management, Jasper will be also be installing Trace-It's scaling and barcode labeling software for repackaging and labeling product as well as operating a small pork boning line within the facility.
